## Our Pioneer Picnic.

## A GATHERING OF GRIFFINS ON THE OLD HOMESTEAD GROUNDS.

We met Tuesday, August 11th, on the old homestead grounds, where no house has stood for more than forty years, and there Capt. Francis M. Griffin of Boston took our pictures in the group on and about the old doorstep where Samuel Griffin, a Quaker from Connecticut, came and settled in a pretty wilderness on the west shore of Stockton harbor, and was the first settler in that part of Searsport, if not the first in the whole town. He came to get his family away from the bad influences of the revolutionary war. Soon after they settled here their last child, a little daughter, was born, but did not live long enough to acquire a name, and her little grave was made on a cozy knoll northeast of the house overlooking the whole harbor; and here, afterward, Peleg, a mere boy, and Elisha, grown to manhood, were both buried; and early in the last century the mother and father were buried with them. The new Northern Maine Seaport railroad now owns the ground of the old homestead and family burial place, and the purpose of our picnic was to gather as many of the relatives as possible to decide to remove the remains to the cemetery in that district and erect a suitable monument to their memory, and to collect additional historical facts concerning this numerous family and get better acquainted with one another.

For the above purposes the relatives assembled at the homestead on August 11, 1908, elected Crawford S. Griffin of Kingman, Me., as president, Dr. Frank Griffin of San Francisco, Cal., first vice president, Mrs. Annie M. Griffin of Belfast, Me., second vice president, Capt. Warren Griffin of Searsport, Me., treasurer, Miss Edna M. Griffin of Searsport, Maine, secretary, (address Park P. O.) and Misses Desire E. Nickels, Harriet J. Hieborn and Prudence Griffin as an executive committee; and the committee were authorized by a unanimous vote to arrange for another picnic of the relatives on the same grounds next year, where we hope to meet annually for a great number of years, with a continually increasing number, and there annually re-elect our officers, compare notes, report results, and plan further work and pleasures; but we cannot expect to outdo the first picnic in genuine pleasure. The only regret was that not more were present. We put all our names on several paper napkins to send to absent relatives, viz., to Mrs. Desire Harris of Portland, Me., Capt. William Griffin in Santa Rosa, Cal., and Andrew G. Staples in St. Paul, Minn., and two or three others I do not now recall. Fred A. Griffin and wife of Belfast made the longest drive to get there; but Mrs. Elizabeth McG. Nickels (a great, great granddaughter of Samuel Griffin) and her daughter, daughter-in-law, and two granddaughters represented the longest line of descendants who were present.

After meeting on the old house lot we all went across the gulch to the little family burying ground, where the five graves are each marked only with simple flat field stones fifteen or twenty inches long and six or eight inches wide, set in the earth on end with no inscriptions on them, and Capt. P. M. Griffin took a picture of the graves; and there we assembled again and C. S. Griffin called the meeting to order and stated the purposes of the meeting, and after remarks by others read the following paper, which may help many of the relatives to trace their ancestry.

Samuel Griffin, who settled with his family on this spot April 11, 1775, was born in New London, Ct., and married Desiah Cray, who was born in the north of Ireland of Scotch parents. Tradition says she died here in 1805 and he died here in 1807. An infant daughter, born soon after they came here, and their son Peleg, were buried with them. We do not know the date of Samuel Griffin's birth, marriage or death, or of his wife's. But we know more of their children, who were as follows:

1 Samuel, Jr. Born in New London, Ct., Dec. 6, 1763. Died in Clarksville, W. Va., August, 1828. He married Sarah Seaf of Baltimore, Md., in 1777. b. June 24, 1763. d. February, 1837.

2 Elisha (never married). Died after reaching manhood. Buried here.

3 Eben. Born in Gratton, Ct., Jan. 20, 1758. Died in Searsport, Me., May 24, 1849. He married Lydia Pendleton of Searsport. b. Aug. 11, 1771. d. Dec. 13, 1812.

4 (William, father of Robert of Northport, Me.) Born in Gratton, Ct. He

m. Hannah Miller. They settled in Copely, Ohio.

5 Nathan. Born in Stonington, Ct., Mar. 30, 1763. Died in Stockton, Me., Feb. 5, 1845. He m. Elizabeth Treat of Stockton on Dec. 10, 1789. b. July 10, 1769. d. Jan. 22, 1837.

6 Desiah. Born in Stonington, Ct., March 15, 1767. Died in Northport, Me., Dec. 3, 1856. She m. Peleg Decrow of Northport in 1796. He d. June 17, 1842.

7 Peleg (never married). Died young and was buried here.

8 Isaac. Married Olive Benson on Feb. 27, 1800, and moved to Missouri in 1810.

9 Jesse. Born in Stonington, Ct. Never married. Died at sea aged 18 years. Buried at sea.

10 Infant girl born here and was the first one buried here.

11 They lost an infant born between Nathan and Desiah at Stonington, Ct.

Grandchildren of Samuel and Desiah were:

1 Samuel Jr.'s eleven children were Nancy (m. John Lang), John (m. Penelope Watson), Henry (m. Rachel Webb), Susannah (m. Thomas Webb), Samuel 3rd (m. Dorothy Dennison), Edward (never m.), William S. (never m.), William S. (never m.), both died in war of 1812, Joshua H. (m. Sallie Pierce), James (m. Martha Herbert), Benjamin S. (m. Eliza Cutler), George G. (m. Elizabeth Thomas).

2 Eben's 5 children were, Elisha (m. his cousin Desiah Decrow), Eben (m. Claricy York), Peleg P. (m. his cousin Jane Decrow), Phineas, Thomas, Otis, Alexander (m. Sarah Tarbell), Lydia (m. John Hurd).

4 William's 10 children were, Mary, Samuel, Hannah, Annie, William, Jane, Robert, David, James, George. (Most of these settled out west.)

5 Nathan's 10 children were, Catherine (m. Joseph Park), Peleg (m. Mary M. Clewley), Desiah (m. Harry Hieborn), John (m. Elizabeth Dickey), Nathan, Nahum (m. Amelia Colcord and Mary Clifford), James (m. Lydia Blanchard), Jesse (m. Maria Ford and Sarah Patten son), Isaac (m. Delilah E. Staples).

6 Desiah's 5 children were, Peleg (m. Abigail Perry, Desiah (m. Elisha Griffin), Emory (m. Henry Palmer and Wm. Miller), Jane (m. Peleg P. Griffin), Isaac (m. Grace H. Miller).

8 Isaac's 5 children were, Nancy, Jesse, Isaac, Oliver and William, born before he moved to Missouri.

Dr. Griffin recently cast on a visit is the prime mover for a suitable monument to our ancestors, but could not stay to meet with us.

I learned at the picnic that "Desire" was the correct old spelling of our ancestor's given name, in place of "Desiah." I mention this fact because many of the female descendants have been given this name.

C. S. GRIFFIN.

## LIE NAILED, NAIL CLINCHED.

That campaign lie about Hon. John P. Swasey in the second district was cunningly conceived, it was a vigorous sprinter and it had got a good start, but it was promptly run down and nailed, and the nails have been clinched so hard and fast that the lie will never go again. The first nail was Mr. Swasey's positive denial that he had ever said as reported that the laboring classes were getting more than they deserved. The second nail was the sworn statement of Isaac Tobin of Canton that Mr. Swasey never said anything of the kind in his hearing. The third and last nail appears in the form of a letter to the Waterville Sentinel by S. B. Ellis of Canton, another neighbor in whose presence and in conversation with whom Mr. Swasey was said to have made the slighting remarks. This is the letter:

Canton, Me., Aug. 15, 1908.  
To the Editor of the Waterville Sentinel:

In relation to the statement printed in the Waterville Sentinel under date of Aug. 11 and later dates, I wish to say that the statements made to your paper and the Argus as to a conversation which I had with John P. Swasey are not true. The conversation was not about laboring classes in general but related only to the Oxford mills.

Mr. Swasey did not say then, nor never did in my presence, that the laboring classes were getting more than they deserved.

The whole publication was an underhanded trick and intended to injure Mr. Swasey. We had no heated discussion at all. Most of the talk was in a joking manner and with no thought of an argument.

I have known Mr. Swasey personally all my life and known him to be upright and honorable.

Respectfully,  
S. B. ELLIS.

Mr. Ellis is a Democrat, but this Democratic trick of attempting to foist upon the Republican neighbor a discreditable statement which he did not make disgusts him, and he repudiates it entirely, so far as he is concerned. The design was to stir up the labor vote against Mr. Swasey, but the poison of the attack has been neutralized so quickly that it is not likely to do any harm. In fact the unfairness of it may help him more than it hurts him. The lie is securely nailed, but the Democratic managers will probably go on insisting that there must have been some basis to the report and that if Mr. Swasey did not say so he probably thought so and therefore should be voted against on general principles like the Dutchman who whipped his boy for thinking damn.—Portland Press.

## REUNION OF 17th MAINE.

## UNCLE SAM'S NEW FORESTERS.

WASHINGTON, D. C., Aug. 24. Thirty-nine young graduates of nine American Forest Schools have lately received appointments as Forest Assistants in the Forest Service and have been assigned to positions for the present field season. The new appointees are drawn from the various Forest Schools as follows: Yale, 18; Biltmore, 5; University of Minnesota, 4; University of Michigan, 4; Michigan Agricultural College, 3; Harvard, 2; Cornell, 1; University of Iowa, 1, and University of Nebraska, 1. They have secured their appointments as a result of passing the regular Civil Service examination, which is the only avenue to employment as a forester under the Government. In addition to these graduates of Forest Schools, fifteen other candidates passed the examination.

Twenty-two of the new appointees are already at work on various National Forests, taking part in their administration, and seventeen have been assigned to different projects connected with the technical study of silviculture. Forest Assistants are men who have completed their preliminary training for the profession of forestry, as the graduates of a law or medical school have completed theirs, and are ready to enter on practical work. Until they have gained experience in their work, however, their positions are necessarily subordinate. They are at the foot of the ladder, and must prove their fitness in order to mount higher. The Government pays them \$1,000 a year at the start.

On the National Forests the Forest Assistant often acts as adviser to the Supervisors in charge, who are western men experienced in all practical matters, but usually without school training in the science of forestry. Or they may be assigned to the study of some particular problem which needs to be investigated in the interest of good forest management. As forestry means knowing how to get the most out of any given piece of forest land, it calls for studies and experiments, both scientific and practical, much like those which have to be made in the interest of good farming management, and the Forest Assistant is prepared to do valuable work along this line.

There is a growing interest in the profession of forestry now, and many young men are asking how to get into it and what it promises. Gifford Pinchot, the Government Forester, has lately written on this subject:

"To be a good forester a man should combine something of the naturalist with a good deal of the business man. To know how to use the forest he must be able to study it. He must have, therefore, the power of observation, a fondness for nature, and the ability to penetrate her secrets. But if he is to succeed he must have good practical judgment and the ability to meet and handle men. He must be resourceful, able to stand for himself, will to undergo the privations of rough life, and capable of commanding the respect of rough men, who quickly recognize virility and genuineness of character, but will not tolerate pretense or the assumption of superiority. A forester needs a vigorous mind in a vigorous body. He must be of the kind that likes to get things done, and does not give up when things are not going his way. He will have to face difficulties and work out problems far from outside help, relying solely upon himself. He ought to be hard to whip."

"The professional forester cannot hope for big fees and certain pleasant surroundings of life which crown distinguished success in some other professions. The first prizes which are bestowed upon the great lawyer, the eminent physician, are not yet open to him. He must be content without much luxury; he will have to spend a good deal of time out of reach of the ordinary comforts. He must be able and willing to rough it without complaint—to sleep on hard beds, eat homely fare, endure prolonged exertion and get along with plain people. On the other hand, if he is at all fitted for his profession—and a few weeks of actual forest work or good summer school work will tell him whether he is or not—there is open to him a very rich reward; life in the open, in the midst of beautiful, healthful and congenial surroundings, creative work of unmatched usefulness in any material field, a place of large responsibility and dignity, and with it all a fair living."

"If the forester's temperament is scientific he will have the joy of the discoverer and organizer of knowledge in a rich and almost virgin field, while if it be practical he will have the chance of sharing in a national work of prime importance to our people both now and hereafter."

## Prosperity in Sight.

Whether the prosperity agitators or the calamity howlers are right, there is no disagreement as to this being a great and magnificent country with wealth and resources far above that of any other nation, even if it is passing through a business and financial depression that has been sorely felt and greatly deplored. So let us determine to bring about renewed activity in trade that will be sure to follow the abundant harvests which Providence has in store for us—harvests that will be welcomed not alone in the New World, but in the Old World that is anxiously waiting to purchase what it so greatly needs—our surplus grain and cotton products. The prospect for the future is bright despite the passing clouds, even for shipping in the near future, as it is believed that the House, soon after Congress assembles, will pass the Senate Ocean Mail Bill and thereby to some extent furnish protection for the only large American industry that is at present unprotected.—The Marine Journal.

## Dixie II's Phenomenal Speed.

Last week, in a race in Hempstead Harbor, L. I., the motor boat Dixie II, proved to be the fastest motor boat in the world. In four tests of speed with other boats her average was at the rate of 31.03 nautical or 35.74 statute miles per hour. The boat was steered by her designer, Clinton H. Crane, with his brother, Harry M. Crane, acting as engineer. The hull was built at Wood's Yard, City Island, N. Y. During the race the Dixie II's engines worked perfectly and they were unanimously pronounced the finest specimen of engine speed mechanism ever seen in this country. She is fitted with an eight-cylinder Crane & Whitman engine, this being the first big engine of that type turned out, and they made a trifle more than 800 revolutions. The horse-power is slightly in excess of 200.—The Marine Journal.

## UNITY.

It has been reported in several papers that Guy Ames, the victim of the supposed drowning accident in Winnecook Lake last winter, is safe and sound in California with his uncle. Although it has been denied by relatives here, it has aroused the feelings of the people in the community so much that it would be deemed a great favor if some near relative or friend would have the facts of the case printed. The annual meeting of the Clough Charitable Association, which was held at Windermere Park Aug. 13th, was largely attended. As the weather looked threatening in the morning the crowd arriving on the trains were small, but as the clouds cleared away the teams kept coming in from near-by towns until a large crowd had assembled. The address by Herbert C. Libby of Waterville was very interesting and highly appreciated and the base ball games were much enjoyed, especially the one between the old Troys and Freedom. The day closed with a grand ball in the evening. Mr. and Mrs. Will Ward and little daughter went to Fairfield last week to attend the wedding of Mr. Ward's sister. Mrs. Horace Chase returned several days ago to his home in New Jersey where he will remain and attend to business. His family will stay until later. The marriage of Miss Lottie Kelley and Henry Foster, both of this town, occurred

## Nothing So Good For Dyspepsia AND Stomach Troubles

Thomaston, Me., Sept. 15, 1908.  
"The true 'L. F.' Atwood's Bitters are our family medicine. My wife has used a number of different patent medicines, but has found nothing yet equal to the true 'L. F.' for dyspepsia and stomach troubles."  
Yours very truly, O. A. Robinson.  
The true 'L. F.' Atwood's Bitters, free from any harmful ingredient, act most beneficially on stomach and liver, removing congested conditions, regulating digestive ferments, cleansing, invigorating and recuperating. For nearly sixty years they have stood for health and happiness in thousands of homes. 35c. at dealers.

Aug. 12th. Congratulations are in order. Mrs. Lizzie Dolloff has sold her residence to Charlie Stevens and intends to move to Belfast to be with her daughter Laura, who has had employment in the shirt factory there for several years. The infant son of Mr. and Mrs. Pearl Reynolds died Aug. 16th. Although the little one was never well his death came very suddenly. Much sympathy is felt for the mourning ones. McCauslin & Stone bought and shipped several carloads of potatoes last week. Price paid 75 cents per bushel. Frank Stewart was the victim of a serious accident several days ago. While working at Chase's and Bartlett's saw mill he attempted to go through a trap door by taking hold of the prop, which gave away letting the door down, striking him in the face and breaking his nose in three places. By giving prompt attention and medical aid and care the patient at this writing is getting along finely. Miss Mabel Bacon, who has a position in Cliffondale, Mass., will return this week to resume her duties in school work. Ed. Reynolds met with a painful accident last week. While mowing with a machine he lifted the cutter bar in such a way as to throw his shoulder out of joint and break it. His many friends are glad that he is getting along so well as to be able to be out. Miss Helen Thomas from Waterville and Wallace Chase from Massachusetts were guests at the home of Mr. and Mrs. E. D. Chase last week.

Brown from Unity village attended the meeting of Dana B. Carter Post Aug. 21st. Mrs. Charles George, who has been very sick with typhoid fever, is gaining slowly. Miss Edith Lawrence is dressmaking for Mrs. Leon Wiggins in Montville. Frank Holmes from Somerville, Mass., is stopping a few weeks with his family at Gustave Bellows'. Anson Bradstreet is quite sick with a bad cold. School at the Academy will open Tuesday, Sept. 1st. It looks as though it would be the largest school for years. We are all pleased to see them come in and hope there will be a steady increase so that the Academy will have to be enlarged to hold them. Rev. J. Burford Parry preached Sunday Aug. 23d from Romans 6-23, taking for his text "The wages of sin is death." The church was well filled and all enjoyed the sermon very much. The male quartet furnished some fine music. Mrs. Sarah Kenney from Knox and her nephew, John Sparrow, from Massachusetts, passed Aug. 23rd with Mrs. Kenney's brother, Willard Sparrow.

## SAVING THE GRAIN BILL.

From my own experience and observations and what others have told me of theirs I have come to think that farmers have been, and are now, feeding too much grain to get the best profits from their poultry and animals. It is a habit they have drifted into, with the hope of getting better returns. Now the high cost of all kinds of grain is causing their eyes. Some have commenced to see their mistakes and others will later.

I know of farmers who grain their milch cows even when the feed in the pastures is at its best and I know of other farmers who have kept colts and horses that were not working in the barn all summer and fed them grain when they might have been getting their own living in the pastures. The majority of farmers keep their hogs in pens and give them corn and meal when they might be in the pastures and orchards looking for food for themselves and would get fat at the same time.

I know of many who are giving their hens and chicks all the grain that they can eat, while the grasshoppers are destroying their crops.

If one ventures quite near them they will make an effort to catch it, but they do no trouble about looking them up. Grasshoppers are a natural and perfect food for them, then while they are devouring the crops why not compel the hens and chicks to eat them?

I heard a prosperous farmer say recently that he was all done graining his cattle. He said he had six three-year-old steers ready for beef that he had been offered eight cents per pound for, and they had never eaten a mouthful of grain. Their only food had been a good early cut hay and winter and green grass summers. I know of another man who had a herd of Jersey cows that never ate a bit of grain, and they were tough and healthy. He considered that they lasted longer, and gave as much, if not more, milk in the long run than they would if grain fed.

An enterprising farmer told me recently that he had two hogs which were running in his pasture and wood lot. There are several acres of raspberry bushes where the wood has been cut out. This summer there were bushels of berries on these bushes and the hogs have feasted on them and got fat. He said he had not fed them since the berries began to ripen. He said they are in better condition than some he has in his barn that are eating all of the meal they can get. He had some hogs in his wood lot one year when the beech nuts were plentiful. They lived and grew fat on them just as those this summer have on berries. He also thinks well of the plan of planting artichokes in the orchard and turning in hogs to work the ground for them.

Our domestic animals descended from wild ancestors. The same instincts are dormant within them waiting to come to the surface under the right conditions. Then, whenever practicable, it seems to me that it is wise to let them live on the food provided by nature.—Bertha F. Hillman of Troy, in the American Cultivator.

## MAINE NEWS ITEMS.

Owing to lack of employment at both the granite works and shoe shops in Hallowell numbers of citizens are leaving town, securing work in other cities.

Bath is to expend \$26,000 for sewers this fall. The sewers are to be from 20 to 42 inches in diameter and made of concrete. It is to be quite a job, but one that the city needs.

Bath merchants say their trade from summer visitors is ahead of last year. The transportation companies are ahead of last year in the amount of travel passing through that city.

The Masonic bodies of Hallowell are considering the idea of erecting a temple of their own on the corner of Water and Winthrop streets. The land and buildings can easily be secured, and their present quarters are only leased.

The Penobscot grand jury found 91 indictments of which 60 are for the violation of the prohibitory law. It is stated that no indictments were found against owners of buildings in which it has been alleged that intoxicating liquors have been sold.

At a recent meeting of the Augusta city Government a resolve was adopted that in the enlargement of the Augusta public building, preference should be given to local labor, and material and supplies be purchased in that vicinity and not out of the State.

In 1887 the State was paying yearly interest of \$240,000 on its debt. Last year it paid less than \$30,000. In twenty years the burden has been lifted to that extent, and the State is now able to use for needed purposes the money which formerly went to its creditors.

At a meeting last week of the Waterville board of trade matters relative to the entertainment of the Maine State Grange next December were considered. Some 1500 visitors are expected and accommodations for these must be provided. Foss Hall, the Colby dormitory, has been engaged and has 75 rooms. The Elmwood hotel can handle 300 people and the Bay View about 100. This will leave the remainder to go to private houses.

At the meeting of the Kennebec bar association Aug. 19th, Chas. F. Johnson, Herbert M. Heath and M. S. Tolway were appointed a committee to draw up resolutions on the death of Hon. Orville D. Baker, which will be presented at memorial exercises to be held in October. Memorial exercises of the late Lendall Titcomb and Albert G. Andrews will occur at the same time. It was voted to attend the funeral of Mr. Baker in a body.

Lightning did considerable damage here last week. It entered on the telegraph wires at Mr. Fred Ellis' house and Mrs. Lizzie Whittier's children from Everett, Mass., who were visiting here, were badly burned. A girl of twelve years and a boy of four were both injured and were unconscious for some time. Dr. Stevens was called to attend them. Their escape from death was remarkable. Lightning also came in on the wires at Mr. Jefferson Clark's house, tearing off paper and plastering but no one was injured.

The old man rose and quickly a flash I seemed to know what was in all about. Two or three times I'd had similar experiences, when I seemed to see Parke and knew what was in his mind, through his wife's eyes. That was one of the things that seemed to me the strangest; my good friend, she was so full of his friend's wife, but it seems to be our minds that telegraph to each other. I sat for a moment, looking at her, and then I caught the bit of woodbine she held, with eyes that did not see. Presently he picked up the thread:—"Through Mrs. Parke I could reason that it was all about. Parke had son-in-law, and I was sure he would prefer in regard to getting out a book, and he had spoken to her about offering me half the work and half the profit." And she, woman-like, well, perhaps not so, an old bachelorette, said, "I was an old bachelor, and I can keep it all for him, if you wish, and I can do just as you think best about it, said she, 'but I shouldn't like to ask him.'" "But I shall ask him, Emily," I said. "I shall offer him half of the six hundred." I heard Parke say that as plain as you can hear me now.
